

I, like many working Americans, have to travel a large area to perform my job. Listening to XM-Radio has been a God-send and keeps me up-to-date while taking care of the business for the company. The weather and traffic reports from XM-Radio is an enormous help in helping me to be better prepared for what could become a problem nasty problem - I work on communication tower sites my company owns and/or manages.

In addition, I can also keep up-to-date on world events by listening to the major TV newscasts, i.e., FOX News and HeadLine News.

Therefore, I urge the FCC to reject the NAB's petition 04-160 and continue to support XM's information and entertainment I need to be prepared as much as possible.

Respectfully,
John L Hargraves
